Web site @ [www.jaquith.com](http://www.jaquith.com)

Jaquith Industries Inc. has purchased a 4000 watt 5x10 Laser cutting system with a fully automated 10 shelf FMS material handling system that can run 24/7. As a result, we can cut a wide variety of materials at highly competitive prices. We produce a large amount of steel offal related to a number of current standard products that we manufacture. Much of this offal, in the past, was sold for scrap as we were hard tooled and had no economical way to use it to produce components for other industries.

With the change from hard tooling to soft tool technology, we can now easily convert this offal into usable products. We are looking for companies who use steel, aluminum, and stainless steel components in their manufacturing processes and are looking to dramatically lower their costs. *We would be glad to quote parts both large and small.* We are especially looking for companies who use the following material and have parts that will fit inside these blank sizes. We produce thousands of these and we can save you both, time *and* money....

16 Gage	A570 GR 36 Hot Roll Steel	Drop size	10"	Diameter
12 Gage	A570 GR 36 Hot Roll Steel	Drop size	2 3/4"	Diameter
12 Gage	A570 GR 36 Hot Roll Steel	Drop size	3 9/16"	Diameter
12 Gage	A570 GR 36 Hot Roll Steel	Drop size	3 7/8"	Diameter
11 Gage	A570 GR 36 Hot Roll Steel	Drop size	10"	Diameter
7 Gage	A570 GR 36 Hot Roll Steel	Drop size	10"	Diameter
1/4"	A36 Hot Roll Steel	Drop size	10"	Diameter
3/8"	A36 Hot Roll Steel	Drop size	3 3/16"	Diameter
3/8"	A36 Hot Roll Steel	Drop size	9 1/4"	Diameter
3/8"	A36 Hot Roll Steel	Drop size	10"	Diameter
1/2"	A36 Hot Roll Steel	Drop size	10"	Diameter
3/4"	A36 Hot Roll Steel	Drop size	10"	Diameter

We can cut any shape in both large and small volume at drastically reduced prices. With our equipment arsenal and a manufacturing facility of over 120,000 sq ft, we can perform many other complementary operations for you as well.

**Laser cutting, Engraving, Shearing, Forming, Punching, Rolling, Machining, Drilling, Tapping, Grinding, Welding (Mig, Tig, Stick, Robotic), Sawing, Mitering, Beveling, Sand Blasting, Painting, Assembly, Packaging... Outside services such as Powder coating, Galvanizing, Anodizing, Plating, Heat treating & Annealing are also available.**

*Give us a call @ 315-478-5700 / Fax @ 315-478-5707*
